

ABGD

REDUCING THE RISK OF MRSA IS THIS SIMPLE.

(And can help prevent other infectious disease.)

ACTIVE SURVEILLANCE

Culture high-risk patients and, if positive, place them on contact precautions so that MRSA does not spread.

BARRIER PRECAUTIONS

Gowns, gloves, and masks are available for patient, staff, and visitor transmission prevention. Please use them consistently.

COMPULSIVE HAND WASHING

The easiest and most effective way to stop MRSA and other healthcare-associated infections from spreading.

DISINFECTION OF ENVIRONMENTS

Thorough cleaning and appropriate use of products are absolutely necessary to reduce the transmission of MRSA.

Stopping MRSA is in your hands.
